

# SMART HOMES FOR MODERN LIVING

**B L U E T O N E**  
SYSTEMS INTEGRATION

## TECHNOLOGY WORTHY OF YOUR HOME

Bluetone work with homeowners, builders and designers to create elegant and intuitive electronic solutions for modern living.

We use carefully chosen technology to help you create a comfortable, welcoming, functional and secure smart home.

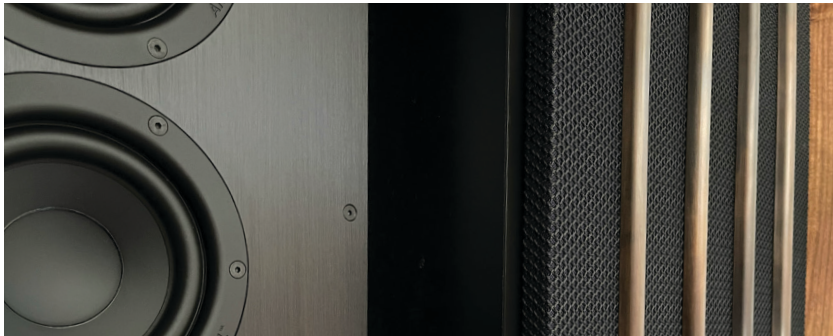

Our systems blend seamlessly with your home design.

## AUTOMATION

Set the mood in every area of your house with a single button press. Create easy scenes for cooking, entertaining, studying or sleeping.

We use sophisticated and simple smart home controls to combine lighting, curtains & blinds, heating & cooling, audio/video, pool controls and more. Your choice of keypads, touchscreens and apps to suit your room design.

# AUDIO VIDEO

Play sounds and pictures from your smartphone, the Internet or TV services on discreet speakers and screens carefully integrated into any room design. Hide them or showcase them – it's up to you.

We can make your TV and its nest of cable spaghetti look like a work of art, hide all the black boxes and give you one simple remote to control them all.

Do something special with your media room with a fully immersive home theatre experience with awesome surround sound, or maybe a projector with a huge screen.

For the ultimate listening experience, we can build you an audiophile stereo system with a choice of premium turntables, amps, loudspeakers and accessories.

And we do smaller stuff, too. So whether it's a simple free-to-air TV mounted above the kitchen bench or a grand dedicated home cinema, we'll tailor something to fit your home.

# SECURITY

See who's ringing your doorbell from anywhere in the world. Review motion-detection camera footage from an app on your phone, or check them live on your TV screens when you're home.

Open the garage door and switch off the burglar alarm simultaneously as you pull onto the driveway. Set up access codes for your cleaner or gardener and receive notifications as they come and go.

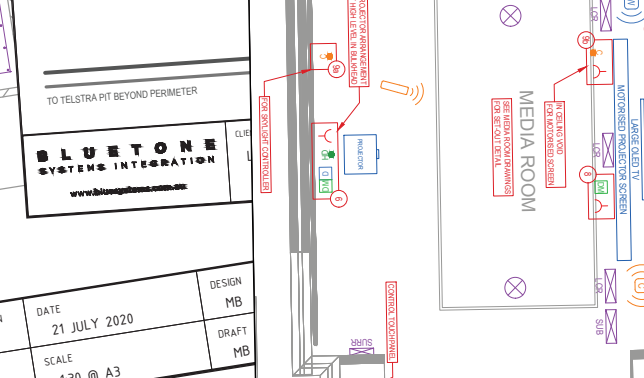

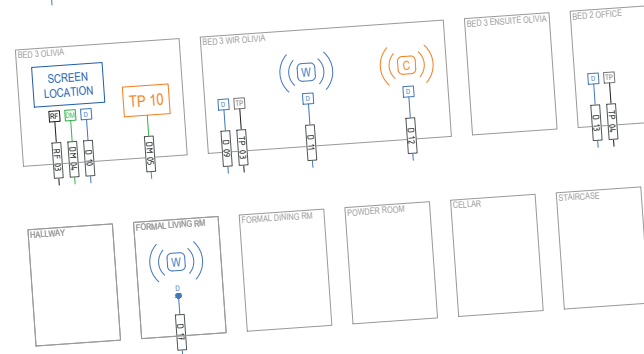

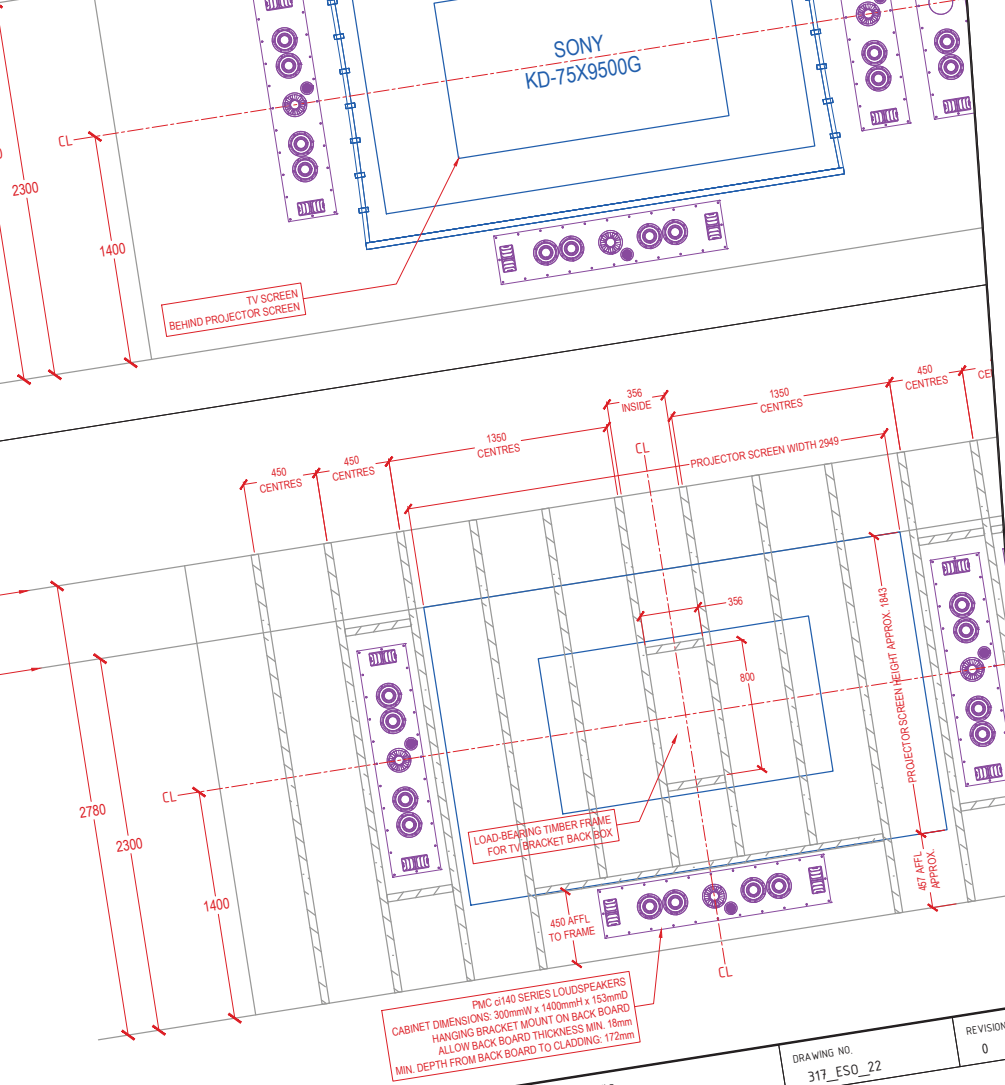

## NETWORKS

You and your family rely on your computers and smart devices as part of your daily lives, so you need them to work properly.

Rest assured that your data is safe and backed up. Know that your family are operating safely on the internet.

We ensure your online services are fast, stable and secure with quality network and wireless platforms that will cope with today's (and tomorrow's) demanding devices... not to mention demanding families!

# DESIGN

To be sure of a smooth-running project, there's no substitute for careful planning. With our extensive experience of residential and commercial projects of all sizes on both sides of the globe, and by paying attention to emerging trends and technologies, we offer a comprehensive consultation and design service.

As part of your design team, we'll help you develop ideas and design sensible solutions. We'll listen to your brief, discuss what's possible, show you options and explain things clearly, helping you to plan and budget for a useful, usable system.

You can be sure that you're planning for the future with the right wiring and hardware. We provide thorough documentation, including drawings, schedules and specifications for your build team, with project management to support all stages of the build.

# LIVING

We pride ourselves on building reliable and user-friendly smart home systems. Like all technology, it's important to keep these systems maintained with security updates and improvements as they become available. We offer full support for our systems long past the project completion to keep them running smoothly.

# TESTIMONIALS

“Bluetone worked in unison with our builders and came and went as required to undertake their preparations and final installations and commissioning of the system. They provide us with support, software upgrades etc. on an ongoing basis. We have a cutting edge Audio Visual system that suits us perfectly and is stable and easy to use and much admired by our friends. It goes without saying we would be happy to recommend Bluetone to both families and residential developers as top-shelf technology experts.”

• *Rick Butler*

“From my first meeting with Bluetone, I knew I was in the right hands. They are a pleasure to have in your home and their work is meticulous and well organised. They are trustworthy, very clever and will sort out all your tech requirements depending on your budget (big or small) and give you alternatives to work with. I guarantee you will not be disappointed with the service Bluetone provides. No job is too small and they are always happy to help!”

• *Melanie Bloom*

“Bluetone were recommended to me by a friend as I was very unhappy with the original company who had done my setup for me previously. From the moment they got involved, their timeliness, work ethic and attention to detail were fantastic. The finished product was better than expected and my family and I are very happy with the outcome. I would highly recommend them to anyone looking to solve their problems.

• *Jamie Woodhill*
